Thanks Robert,

It appears that you have captured everything I intended to send. I noticed that my January 31st message indicated that my comments were also being submitted on behalf of the Planning Group.

Do I need to have the group reconfirm that at our next meeting and then submit the same comments under the Planning Group's name? Or just wait to comment on the next phase?

I have attached a letter from CPUC General Counsel Frank Lindh, for the Soitec Solar record, regarding the Live Oak Springs Water source, which I believe is being considered as a potential or backup source of Soitec Solar construction water. Mr. Lindh's letter to Mark McPherson, Chief, Land and Water Quality Division, DEH, confirms the County's right to order Live Oak Springs Water Company to comply with the order to produce a source capacity assessment in compliance with Health and Safety Code 116530, and PUC General Order 103-A.

Jim Whalen previously indicated that Soitec was pursuing a source capacity assessment which may or may not be related to the one mentioned in the CPUC letter. Regardless, the proposed use of high volumes of at-risk groundwater resources for construction of industrial scale energy projects, meant to serve other communities, must be fully and lawfully analyzed and addressed.

Your patience and thoroughness is appreciated.

Donna,

Attached are the two emails you sent me on 3/11 with the attachments. I believe I received everything you intended to send. Please take a look and verify that I have everything from those two emails. If I have everything, I will forward the documents to the applicant and their consultants and my immediate managers. Our processes do not allow for me to directly forward information to higher levels within the County.

Thanks,

Robert,

This is my third try . See kicked back message below.

Instead of sending the pdf version of the attached power point by Professor Henshaw, that is apparently too large to send, I am sending the link for it instead:

www.electric-fields.bris.ac.uk/henshaw_arr_june_2011.ppt . His 2011 power point us titled: The interaction of magnetic fields with biological systems – trying to understand the diversity of reported health effects

Here is a link to the Professor's home page with his credentials and additional information: http://www.electric-fields.bris.ac.uk/d_henshaw.html I have communicated with him briefly.

Please confirm receipt and include the linked and attached documents in the record for the Soitec Solar PEIR MUP.

Thank you,

Donna

Hello Robert,

As promised, I have attached the other two documents by Dennis Henshaw, PhD that were attached to my original message with Soitec Solar PEIR MUP comments sent on January 31 that did not go through.

Also attached are Boulevard Planning Group minutes for June 14, 2012 that you requested.

Please confirm receipt of this and previous message with my Soitec Solar PEIR MUP comments.

Thank you,

Donna
